

SYAIFUL AKROMUL QODRI

Full-Stack Web Developer

D.I Yogyakarta | +62811 7267 158 | aq.syaiful@gmail.com | linkedin.com/in/sya-akrq

ABOUT ME

Full-Stack Web Developer with 4 years of experience building web applications using Laravel and Vue.js. Proficient in developing RESTful APIs, database design, debugging, and system maintenance. Additionally experienced in managing WordPress websites and providing IT technical support to ensure efficient and reliable business operations.

WORK EXPERIENCE

Website Building | WordPress

PT Bintang Media Visual (**Freelance**)

(Nov 2021–Dec 2021)

- Developed and managed a news portal website using WordPress CMS
- Designed and implemented structured page layouts, news categories, and publishing workflows
- Monitored website performance to ensure high availability and minimal downtime
- Diagnosed and resolved bugs, system issues, and plugin/theme conflicts
- Improved website speed, responsiveness, and overall user experience

Slicing Design | WordPress

Hottails and Cocktails (**Freelance**)

(Jun 2024–Jun 2024)

- Developed responsive web pages using Elementor in WordPress based on Figma designs
- Customized themes and Elementor widgets using HTML, CSS, and JavaScript to improve functionality
- Enhanced website performance, responsiveness, and cross-browser compatibility
- Worked closely with clients to refine layouts and deliver solutions aligned with business needs
- Managed content structure and ensured consistency across pages using WordPress CMS

Slicing Design | WordPress

GZM (**Freelance**)

(Jul 2024–Oct 2024)

- Implemented UI/UX designs into WordPress-based websites
- Refined layouts, styling, and page structures to ensure responsive and pixel-accurate implementation
- Ensured optimal performance and functionality across all web pages
- Maintained websites through content updates and iterative design improvements
- Enhanced performance, usability, and visual consistency across the platform

Web Developer | Vue.JS

Muria Trail Run (**Freelance**)

(Feb 2025–Oct 2026)

- Built and maintained web applications using Vue.js and TypeScript with well-structured architecture

- Diagnosed issues through debugging and troubleshooting, and optimized application performance
- Managed deployment and ongoing maintenance to ensure system stability, reliability, and security

IT (Web Developer) | Laravel & Vue.JS

PT PJI PuncakJaya Indonesia (Contract)

(Oct 2023–Oct 2026)

- Built and maintained web applications using Laravel and Vue.js with scalable and structured architecture
- Designed and implemented RESTful APIs and seamless frontend–backend integration
- Integrated third-party payment gateway APIs for secure and reliable transaction processing
- Diagnosed and resolved issues through debugging and troubleshooting while improving application performance
- Oversaw deployment and ongoing maintenance to ensure system reliability and security
- Delivered IT technical support, including software installation, system configuration, and hardware/software issue resolution
- Maintained internal IT infrastructure to ensure high availability and minimal downtime

PROJECT EXPERIENCE

Web Developer | CodeIgniter 3

Lezzetli

- Served as a Back-End Developer using CodeIgniter 3 for developing and maintaining web-based applications
- Built and implemented business-driven features while ensuring system reliability and stability
- Conducted debugging and troubleshooting to resolve bugs and system issues efficiently
- Designed and optimized database structures, including tables, relationships, and query performance
- Worked closely with frontend developers to ensure seamless system integration

Web Developer | CodeIgniter 3

Desa.in

- Built web applications using CodeIgniter 3 with MVC architecture principles
- Designed and optimized MySQL databases, including relationships, indexing, and query performance tuning
- Developed RESTful APIs with proper server-side validation and data processing
- Maintained applications by fixing bugs, improving performance, and enhancing security
- Ensured system stability and reliability to meet user and business requirements
